Application No.: 09/781,585

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

 (Currently Amended) A radio base station for performing a radio communication with a plurality of mobile stations, each of which has a plurality of antennas, the radio base station being configured for:

establishing a radio connection with each of the plurality of mobile stations, optionally using a space division multiplex method; and

when communicating with only one mobile station using time-division time slots, allowing the mobile stations to keep the diversity reception <u>performed in the mobile stations</u>, and when starting communicating with the second or further mobile station using the space division multiplex method, transmitting a diversity reception stop instruction to the one mobile station already connected to end the diversity reception performed in the mobile station.

2. (Original) The radio base station of Claim 1 comprising:

a creation means for creating a piece of traffic channel assignment information after receiving a traffic channel assignment request from a mobile station;

an attachment means for attaching the diversity reception stop instruction to the piece of traffic channel assignment information; and

a transmission means for transmitting the piece of traffic channel assignment information with the diversity reception stop instruction, to the mobile station as a response to the traffic channel assignment request. Application No.: 09/781,585

3. (Original) The radio base station of Claim 1 comprising:

a determination means for determining, after receiving a traffic channel assignment

request from a mobile station, whether to allow the mobile station to space-division-multiplex

with another mobile station which has communicated with the radio base station;

a creation means for creating a piece of traffic channel assignment information when the

determination means determines to allow the mobile station to space-division-multiplex with the

other mobile station;

an attachment means for attaching the diversity reception stop instruction to the piece of

traffic channel assignment information; and

a transmission means for transmitting the piece of traffic channel assignment information

with the diversity reception stop instruction, to the mobile station as a response to the traffic

channel assignment request, and transmitting the diversity reception stop instruction to the other

mobile station through a traffic channel.

Claims 4-6 (Cancelled).
